PROJECTS

Cloud Copier
Sep 2017 to Current

- Single page app entirely in Vanilla JS and Python to move files from one cloud service to another.
- Makes use of the APIs for: Dropbox, Google Drive, Microsoft Graph .

Eat Union
May 2017 to Jun 2017

- Single page app restaurant guide. Developed in React, using custom CSS.

Habitual
Aug 2017 to Current

- Project leader for a one week sprint. Built a native mobile productivity app with React Native and a Rails API back end.
- Helps a user maintain healthy habits and visualizes their progress. Interactions with the app's notification take only 1 second.
- Handled deployment, testing, and CI for project.

SUMMARY

At a young age, I was nominated by my peers to take a leadership position in the Union at my last company. I have gained invaluable experience leading people and I am very confident in my ability be placed into a difficult situation and find a viable and efficient solution. I'm looking forward to joining a team that is dynamic, fast-paced, and solving tough problems through code.
